

07 17 09 flexmls Portal Visitors Can Now Share Listings with Friends and Family

FBS released a new feature to allow your flexmls Portal customers to share listings with their friends and family by e-mail or through a variety of social networking sites.

On the **Search Results page** of the Portal, the option to share the current listing or a group of selected listings is available in the menu.

Click **Share** to select how you would like to share the listing or listings. From here, the user can click E-Mail to open their default desktop based e-mail program (like Outlook or Thunderbird), click Permalink to get a link that they can copy and paste into a variety of locations, or click on one of the social networking links to open that page directly to share the listing link with others.

The share functionality also is available from the Portal Dashboard, where each listing cart includes a link to share the listings it contains.

Carts	
Recommended	1 Listings share
Favorites	4 Listings share X
Possibilities	1 Listings share X
Rejects	0 Listings share X
Removed	1 Listings share

From there, the user can decide if they'd like to e-mail a link to the listing(s), or post a link on one of the social networking sites.
