

Your MLS World

is About to Get **W I D E R.**

Data Sharing with Tucson and Rocky Point (Puerto Peñasco) starts Wednesday, February 23!

The Boards of Directors of both the Tucson Association of REALTORS® and the AMPI Puerto Peñasco Chapter 51 (Rocky Point) recently approved data sharing with ARMLS through the flexmls system. Their decisions follow a national MLS trend to share data with a wider group of Subscribers outside of the effective service area of the primary MLS. While there **will not be a unilateral offer of compensation** associated with the sharing at this time, an elevated level of service capability to clients and customers is the natural result.

Data sharing is NOT intended to encourage Agents to offer their real estate services in areas where they are unfamiliar, not fully competent or not licensed. Article 11 of the Realtor Code of Ethics specifically discourages Realtors from providing specialized professional services that are outside their field or area of competence.

You will be able to select the specific MLS in both the Full Search and the Quick Search.
